

TXDC

Catalogue of Texas Federal Contractors

*Ranking 815 Texas companies above
\$1 million in federal contracts in 2020
and comparing results to 2019 rankings*

Introduction

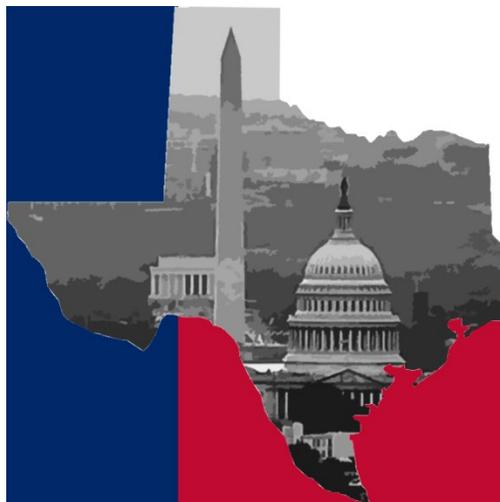

TXDC hopes to earn its spurs in 2021 via data analysis important to private Texas federal stakeholders.

TXDC's goal is to attract paying clients eager for details on congressional legislation and agency regulation and who value timing and confidentiality.

Many of our reports will resemble standard journalism output however **TXDC** claims no such status. We're a private government affairs research shop seeking clients, not subscribers.

With this in mind we offer a new **TXDC** in-house study of:

Federal Contractors in Texas – 2020

Please enjoy the report and feel free to contact **TXDC** anytime with feedback.

Methodology

Data Collection

The data for this report was collected from <https://beta.sam.gov/>. The data is of federal contracts awarded to vendors located in Texas. The time period for the awarded contracts is 1/1/2019-12/31/2020. The data from 2020 was used to find the current rankings of each company while the data from 2019 was used as reference to see how each company performed compared to last year.

Five main data points were collected and analyzed for each contractor:

1. Department Name – From what department was the money awarded?
2. Vendor Zip Code – Location of the vendor
3. Vendor DUNS – The unique seven-to-nine-digit identifier of a business
4. Vendor Name – Company name listed on the award
5. Total Dollars – Total dollar amount awarded

Note: In this report, the terms “vendor,” “contractor,” and “company” are used interchangeably.

Analyzing the Data

The raw data contained some incongruencies, including but not limited to, multiple lines for the same company, differences in spelling of a company’s name, and companies that received awards before and after an acquisition from another company, thus changing their “Vendor Name.”

To make this report as clear as possible, we combined line items that share the same Vendor DUNS number. If a company name appears twice or more in one list, we included its DUNS number for each ranking. **For example:**

Department of Defense					
Rank	Rank Change	Company	County	Total Dollars	Dollar Change (from '19)
1	0	Lockheed Martin Corporation (DUNS: 8016958)	Tarrant	\$22,041,592,022	-\$5,797,716,233
2	0	Lockheed Martin Corporation (DUNS: 794571448)	Dallas	\$9,627,151,714	\$1,344,312,056

Department Rankings

In total, 63 government agencies awarded contracts to vendors located in Texas. We ranked companies by total dollars received from federal contracts from 17 chosen departments of the U.S. Government. The federal departments selected in this Texas Federal Contractors Report tend to be more economics related than social program related. In each agency's list, only companies that were awarded more than \$1,000,000 total dollars in 2020 were included.

Note: A handful of companies received more than \$1,000,000 in contracts, but when combined with their negative federal contracts, their total moved below \$1,000,000, thus removing them from our rankings. Negative amounts most likely relate to de-obligations after a contract has been completed with extra funding that was not used.

See the table of contents for the full list of departments included in this report.

Explanations of Each Column

Please use this snippet of the Department of Defense table for reference

Department of Defense					
Rank	Rank Change	Company	County	Total Dollars	Dollar Change (from '19)
1	0	Lockheed Martin Corporation (DUNS: 8016958)	Tarrant	\$22,041,592,022	-\$5,797,716,233
2	0	Lockheed Martin Corporation (DUNS: 794571448)	Dallas	\$9,627,151,714	\$1,344,312,056
3	2	DynCorp International	Tarrant	\$1,954,906,318	\$345,451,076
4	0	L3 Technologies, Inc. (DUNS: 7365984)	Hunt	\$1,819,156,309	\$147,679,176
5	-2	Bell Boeing Joint Project Office	Potter	\$1,774,385,121	-\$428,591,487
6	4	M1 Support Services, L.P.	Denton	\$1,081,672,594	\$263,083,394

Rank: Companies are ranked depending on how much "Total Dollars" they were awarded by the government agency (in this case the DoD) in 2020.

Company: The name of the company. You can click the company name (not in this list above, but further down in the report) to be taken to their website. If the company does not have a website, we've linked to a page where you can find the company's contact information. In the rare instances where the company has neither a website nor contact info online, the company's name is colored black.

County: The county was determined based on the zip code assigned to each line item in the data. If a company has multiple entries under the same Vendor DUNS and those entries have zip codes in different counties, we used the county where most of the money was awarded.

Total Dollars: The total amount of dollars awarded to the company in 2020 by the department in question (in the example, the DoD).

The next two statistics, “Rank Change” and “Dollar Change” were calculated using **TXDC**’s data and rankings from our 2019 Texas Federal Contractors Report.

Rank Change:

- If **positive**, the company moved up in the rankings. For example, in the Department of Defense List (on previous page), Dyncorp International is ranked 3rd in 2020, but was ranked 5th in 2019, therefore its “Rank Change” is **2**.
- If **negative**, the company moved down in the rankings. For example, in the list on the previous page, Bell Boeing Joint Project Office is ranked 5th in 2020, but was ranked 3rd in 2019, therefore its “Rank Change” is **-2**.
- If **“NR”**, the company is Newly Ranked in 2020, i.e., it did not appear in the rankings in 2019. This means they moved up in the rankings, therefore, “NR” is colored **green** to illustrate the positive rank movement.
- If 0, that means the company is ranked the same in 2020 as they were in 2019.

Dollar Change:

- If positive, the company was awarded more money in 2020 than in 2019. For example, M1 Support Services, L.P. was awarded \$263,083,394 more from the Department of Defense (DoD) than it was in 2019.
- If negative, the company was awarded less money in 2020 than in 2019. For example, Lockheed Martin Corporation (DUNS: 8016958) was awarded \$5,797,716,233 fewer dollars from the DoD than it received in 2020.
- If NA (Not Applicable), the company is newly ranked (NR). Since the company is new to the rankings, we cannot calculate the Dollar Change. One can assume, however, that the company received less than \$1,000,000 in 2019.

Ranking Texas Counties

TXDC calculated how much money was awarded from the US Government to companies that resided in each of Texas' 254 counties. Some of the counties were awarded a negative amount of money. Negative amounts most likely relate to de-obligations after a contract has been completed with extra funding that was not used.

Heatmaps

Included in this report are heatmaps for federal contracting data from each department, each metro area, and of all Texas federal contractors. The maps illustrate how much money in federal contracts was awarded to vendors located in each Texas county.

The heatmaps were created using a logarithmic scale. Next to each logarithmic scale is the conversion to dollars. Some counties had a negative amount of dollars awarded. It is mathematically impossible to take the log of a negative number, so those county totals were replaced with zeros.

To make the connection between the heatmaps and our lists clearer, **TXDC** added a county designation for each company ranking.

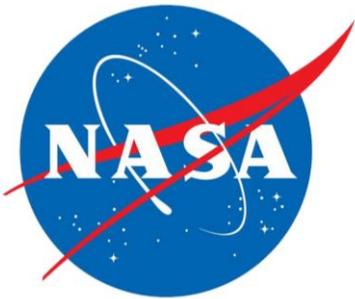

While the lists only contain the vendors that received more than \$1,000,000, the heatmaps were generated from all the data of all vendors who were awarded contracts from the federal government, including those awarded less than \$1,000,000.

The heatmaps were generated in Python using the module, [Plotly](#).

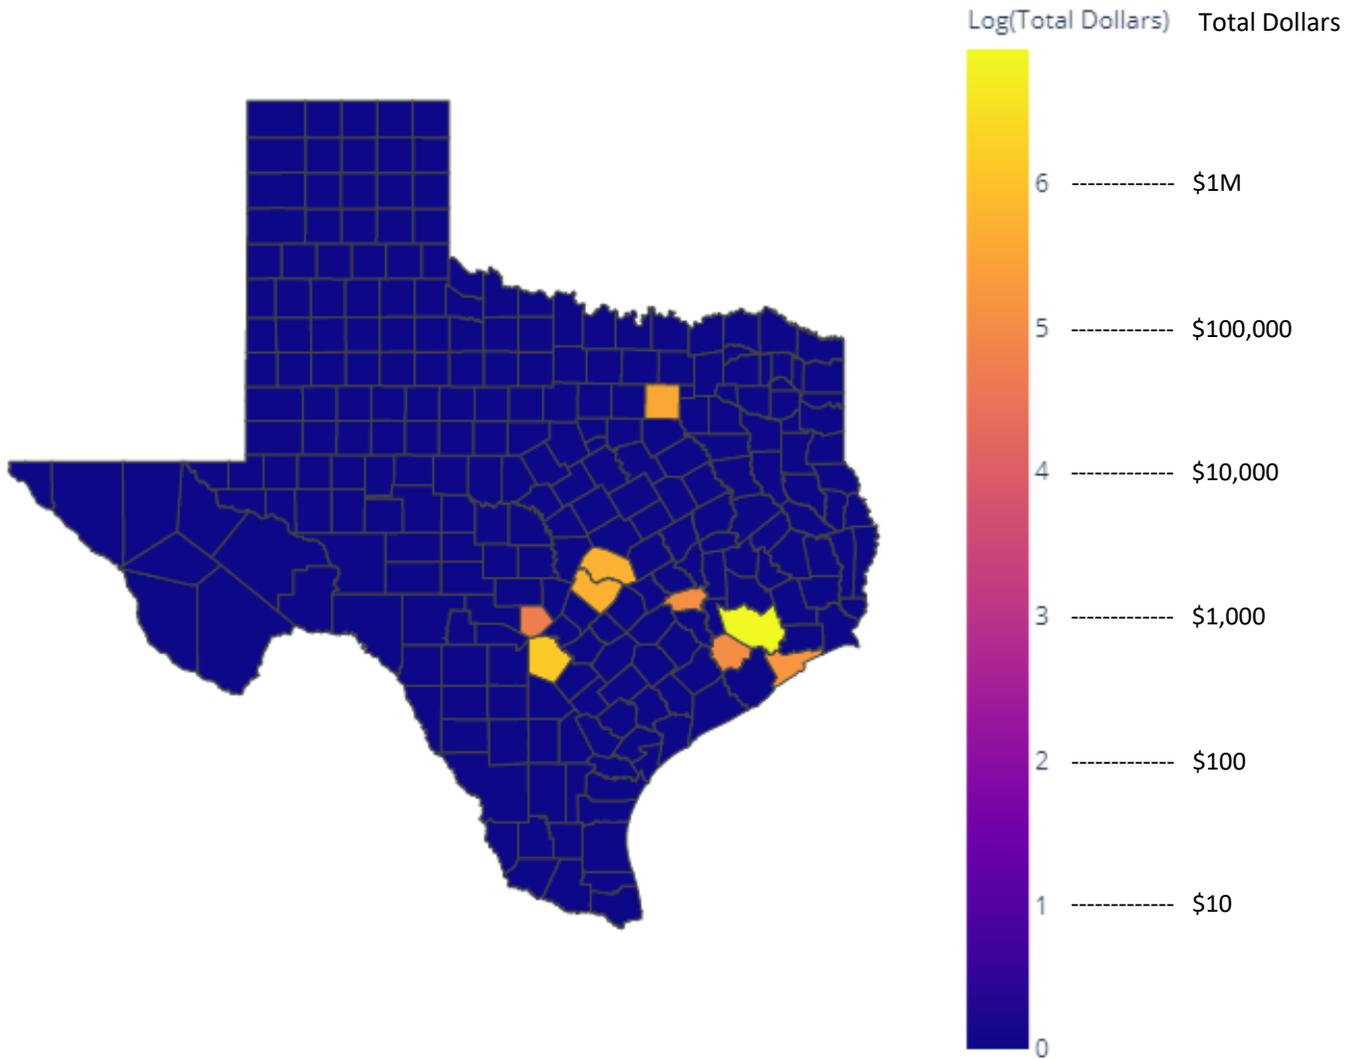

Below is a map of Texas's counties from ontheworldmap.com; included for your reference when looking at the heatmaps.
